<b>Office Action Summary</b>	Application No. 10/773,161	Applicant(s) SAITO, MASAMI	
	Examiner William C. Dowling	Art Unit 2851	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3, 7, 10, 12, 18, 20, 23, 25 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Haile-mariam.

Haile-mariam discloses a projection device comprising:

a projector (7);

a installation fixture including a lower portion (9) for attaching the projector to an upper surface of a desk or table.

The attaching device may be formed of a lower portion which is bolted to a work surface by means of a fixed base (33) and a projector holding portion (10), the two portions being detachable by means of collar and screw (30, 31) slidably engagable with each other. Figure 3

Haile-mariam discloses an invention wherein the projector is supported by a tray and fixed to a table by channel members (17, 18).

Art Unit: 2851

3. Claims 1, 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Inova.

4. Inova discloses a projection arrangement comprising a front projector (26) detachably mounted below an upper surface of a table (25).

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 8, 13, 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Haile-mariam.

Haile-mariam discloses an invention wherein the projector is supported by a tray and fixed to a table by channel members(17, 18). Haile-mariam further shows a threaded member (20) for varying the gap in the channel

It is a well know structure for a tray to have a flat portion with abutted short sides (e.g. cookie tray). Such a structure may be considered to be made of L shaped portions.

Art Unit: 2851

It would have be obvious to one skilled in the art to utilize such a "tray" in the device of Haile-mariam in order to prevent slippage of the projector.

7. Claims 2, 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Haile-mariam in view of Sunaga.

Haile-mariam discloses the invention substantially as claimed but does not specify structure of the projector itself, such as the use of an aspherical mirror in the optical train.

Sunaga teaches a projection optical train including aspherical mirrors.

It would have been obvious to one skilled in the art to modify the device of Haile-mariam by the use of structures known in projectors, such as aspherical mirrors in order to correct for optical aberrations where necessary.

#### ***Allowable Subject Matter***

8. Claims 5-6, 9, 11, 14-17, 19, 24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
